ABSTRACT

The Editorial Committee wants to provide its readers with an update on the commonly used scales. The use of tables and scales is a widespread practice in Orthopedics and Traumatology. The measurement and quantification of clinical, functional, and radiographic aspects have become essential tools for decision-making in different aspects of healthcare activity. We carried out a review of the most used scales, defining their use and including original and updated literature.

Keywords: Scales; scores; tables; update.

RESUMEN

El Comité Editorial quiere brindar a sus lectores una actualización de las escalas de uso corriente. El empleo de tablas y escalas es una práctica muy extendida en la Ortopedia y Traumatología. La medición y la cuantificación de los aspectos clínicos, funcionales y radiográficos se convirtieron en una herramienta imprescindible para la toma de decisiones en diferentes aspectos de la actividad asistencial. Llevamos a cabo una revisión de las escalas más utilizadas, definiendo su uso e incluyendo bibliografía original y actualizada.

Palabras clave: Escalas; puntajes; tablas; actualización.

Nivel de Evidencia: V

INTRODUCTION

The Editorial Committee wants to provide its readers with an update on the commonly used scales. The use of tables and scales is a widespread practice in Orthopedics and Traumatology. The measurement and quantification of clinical, functional, and radiographic aspects have become essential tools for decision-making in different aspects of healthcare activity

We carried out a review of the most used scales, defining their use and including original and updated literature. In this opportunity, we dealt with the section of hand scores.

DASH Scale (Disabilities of the Arm, Shoulder and Hand)

DASH SCALE	1	2	3	4	5
	No difficulty	Mild difficulty	Moderate difficulty	Severe difficulty	Unable
1. Open a tight or new jar					
2. Write					
3. Turn a key					
4. Prepare a meal					
5. Push open a heavy door					
6. Place an object on a shelf above your head					
7. Do heavy household chores					
8. Garden or do yard work					
9. Make a bed					
10. Carry a shopping bag or briefcase					
11. Carry a heavy object (over 10 lbs)					
12. Change a lightbulb overhead					
13. Wash or blow dry your hair					
14. Wash your back					
15. Put on a pullover sweater					
16. Use a knife to cut food					
17. Recreational activities which require little effort (e.g. cardplaying, knitting, etc)					
18. Recreational activities in which you take some force or impact through your arm, shoulder or hand (e.g. golf, hammering, tennis, etc)					
19. Recreational activities in which you move your arm freely (e.g. playing frisbee, badminton, swimming, etc)					
20. Manage transportation needs (getting from one place to another)					
21. Sexual activity					
	Not at all	Slightly	Moderately	Quite a bit	Extremely
22. During the past week, has your arm, shoulder or hand problem interfered with your normal social activities with family, friends, neighbors or groups?					
23. During the past week, were you limited in your work or other regular daily activities as a result of your arm, shoulder or hand problem?					

	None	Mild	Moderate	Severe	Extreme
24. Arm, shoulder or hand pain					
25. Arm, shoulder or hand pain when you performed any specific activity					
26. Tingling (pins and needles) in your arm, shoulder or hand					
27. Weakness in your arm, shoulder or hand					
28. Stiffness in your arm, shoulder or hand					
29. During the past week, how much difficulty have you had sleeping because of the pain in your arm, shoulder or hand?	No difficulty	Mild	Moderate	Severe	Extreme
30. I feel less capable, less confident or less useful because of my arm, shoulder or hand problem	Strongly disagree	Disagree	Neither agree nor disagree	Agree	Strongly agree

Boston Scale for carpal tunnel syndrome

Independent variables	Variable values
Severity at night	Between 1 and 5
Recent awakening due to discomfort	Between 1 and 5
Daytime pain	Between 1 and 5
Frequency of daytime pain	Between 1 and 5
Duration of daytime pain	Between 1 and 5
Loss of sensation	Between 1 and 5
Weakness	Between 1 and 5
Tingling	Between 1 and 5
Loss of sensation and tingling during the night	Between 1 and 5
Recent awakening, loss of sensation or tingling	Between 1 and 5
Functional difficulty	Between 1 and 5
