

Index by Subject 2017

UPPER LIMB

- Impact of radial artery sacrifice in hand perfusion **54**
- Chemical neuritis after steroid injection in a patient with carpal tunnel syndrome. Case report **65**
- Tendon pathology in patients with distal radius palmar locked plate: incidence and clinical outcome of treatment **124**
- Surgical treatment of clavicle displaced midshaft fractures with pre-contoured plates using minimally invasive technique (MIPO) **129**
- Early experience in a High Complexity Hospital with the vascularized fibular graft in segmental bone defects of the upper limb **170**
- Latissimus dorsi transfer for treatment of massive and irreparable rotator cuff injuries **182**
- Dorsal wrist ganglion: arthroscopic resection with “dry” technique. Minimum follow-up of two years **195**
- Congenital forearm pseudarthrosis associated with dislocation of the radial head: surgical treatment with one-bone forearm **242**
- Identification of medial coracoclavicular (Caldani’s) ligament by magnetic resonance imaging. Original protocol and clinical applications **71**
- Short-term results of shoulder reversal prosthesis according to pathology **278**
- Elbow luxation associated with external condyle and radial head fracture. Case report and literature review **312**

LOWER LIMB

- First metatarsal Chevron osteotomy with minimally invasive surgery. Radiological evaluation **19**
- Femoral revision surgery with conical stem of distal fixation **40**

- Periacetabular reorientation osteotomies. Comparative study between triple pelvic osteotomy and periacetabular osteotomy **28**
- Acute Achilles tendon ruptures treated with minimally invasive Dresden technique **48**
- Total knee arthroplasty for gonarthrosis in patients <55 years old. A 2- to 13-year follow-up study **94**
- Total knee arthroplasty following fractures around the knee **102**
- Fasciocutaneous sural flap for soft tissue coverage in the third distal leg, ankle and foot **136**
- Total hip replacement due to osteoarthritis secondary to displasia **231**
- Posterior dislocation of a hinged knee prosthesis. Case report **294**
- Distraction osteogenesis in femoral infected nonunion. Case report **306**
- Arterial trauma secondary to hip arthroplasty. Case report **317**

SPINE

- Intradural neurenteric cysts. Case report **59**
- Sacroiliac joint tuberculosis. Case report and bibliographic review **141**
- Partial sacrectomy by single posterior approach **109**
- Cervical instrumentation and fusion in children under 10 years old **220**
- Traumatic lumbosacral spondylolisthesis. Report of four cases and literature review **249**

TUMORS

- Isolated enchondroma of the hand. Long-term follow-up after surgical treatment. Case series **189**

PEDIATRICS

Treatment of the idiopathic clubfoot after the walking age: a systematic bibliographic review **14**

Usefulness of intraoperative arthrogram in the treatment of pediatric fractures **116**

Post-traumatic diaphyseal bone defects in the upper extremity of children **287**

Convergent luxation in pediatric elbow. Report of two cases **299**

GENERAL TOPICS

Dual-energy computed tomography: new technology for metal artifacts reduction **5**

Orthopedic residency survey regarding several aspects of the program **150**

Pott's disease in the province of Chaco **206**

Surgeon's radiation exposure in the internal fixation of distal radius fractures **271**

Atrophic pseudarthrosis. Effect of extracorporeal shock waves application in an experimental model in tibia of rabbits **321**

Alendronate administered at the fracture site. Experimental study in rabbits **327**

POST-GRADUATE ORTHOPEDICS INSTRUCTION – IMAGES

Case study **3**

Answer to case study: Hemophilic arthropathy **69**

Case study **92**

Answer to case study: “Degloving” type tear of the rectus femoris muscle **147**

Case study **167**

Answer to case study: Osepilunatum **253**

Case study **267**

Answer to case study: Subtle Lisfranc injury **334**
